LOCK-N-LOAD®

MODULAR WALL SYSTEM

LOCK-N-LOAD® MODULAR WALL SYSTEM

The Lock-N-Load Modular Wall System® makes loading bulky cargo in a dry freight body easier. How so?

In less than five minutes, two operators can remove the entire side wall of a dry freight truck to create unobstructed loading - ideal for moving companies and building supply houses. Stay more productive and tie up less working capital by specifying the Lock-N-Load Modular Wall System.
